Laser Series Scraper

The IMC LS Series scraper is fit for maintaining fields, roads, and small sit developments. Walking tandem assemblies along with both front and rear router bits give the IMC LS scraper unsurpassed ability for precision leveling. The LS scraper is available in cutting widths ranging from 12-20 ft wide. This low maintenance scraper can be broken down and transported to the next location within minutes. A swinging tongue option now available on the LS Series scraper decreases break down time even more. Ask your local dealer about the LS Series scrapers.
